DETAIL I  
N.T.S.

NOTE:

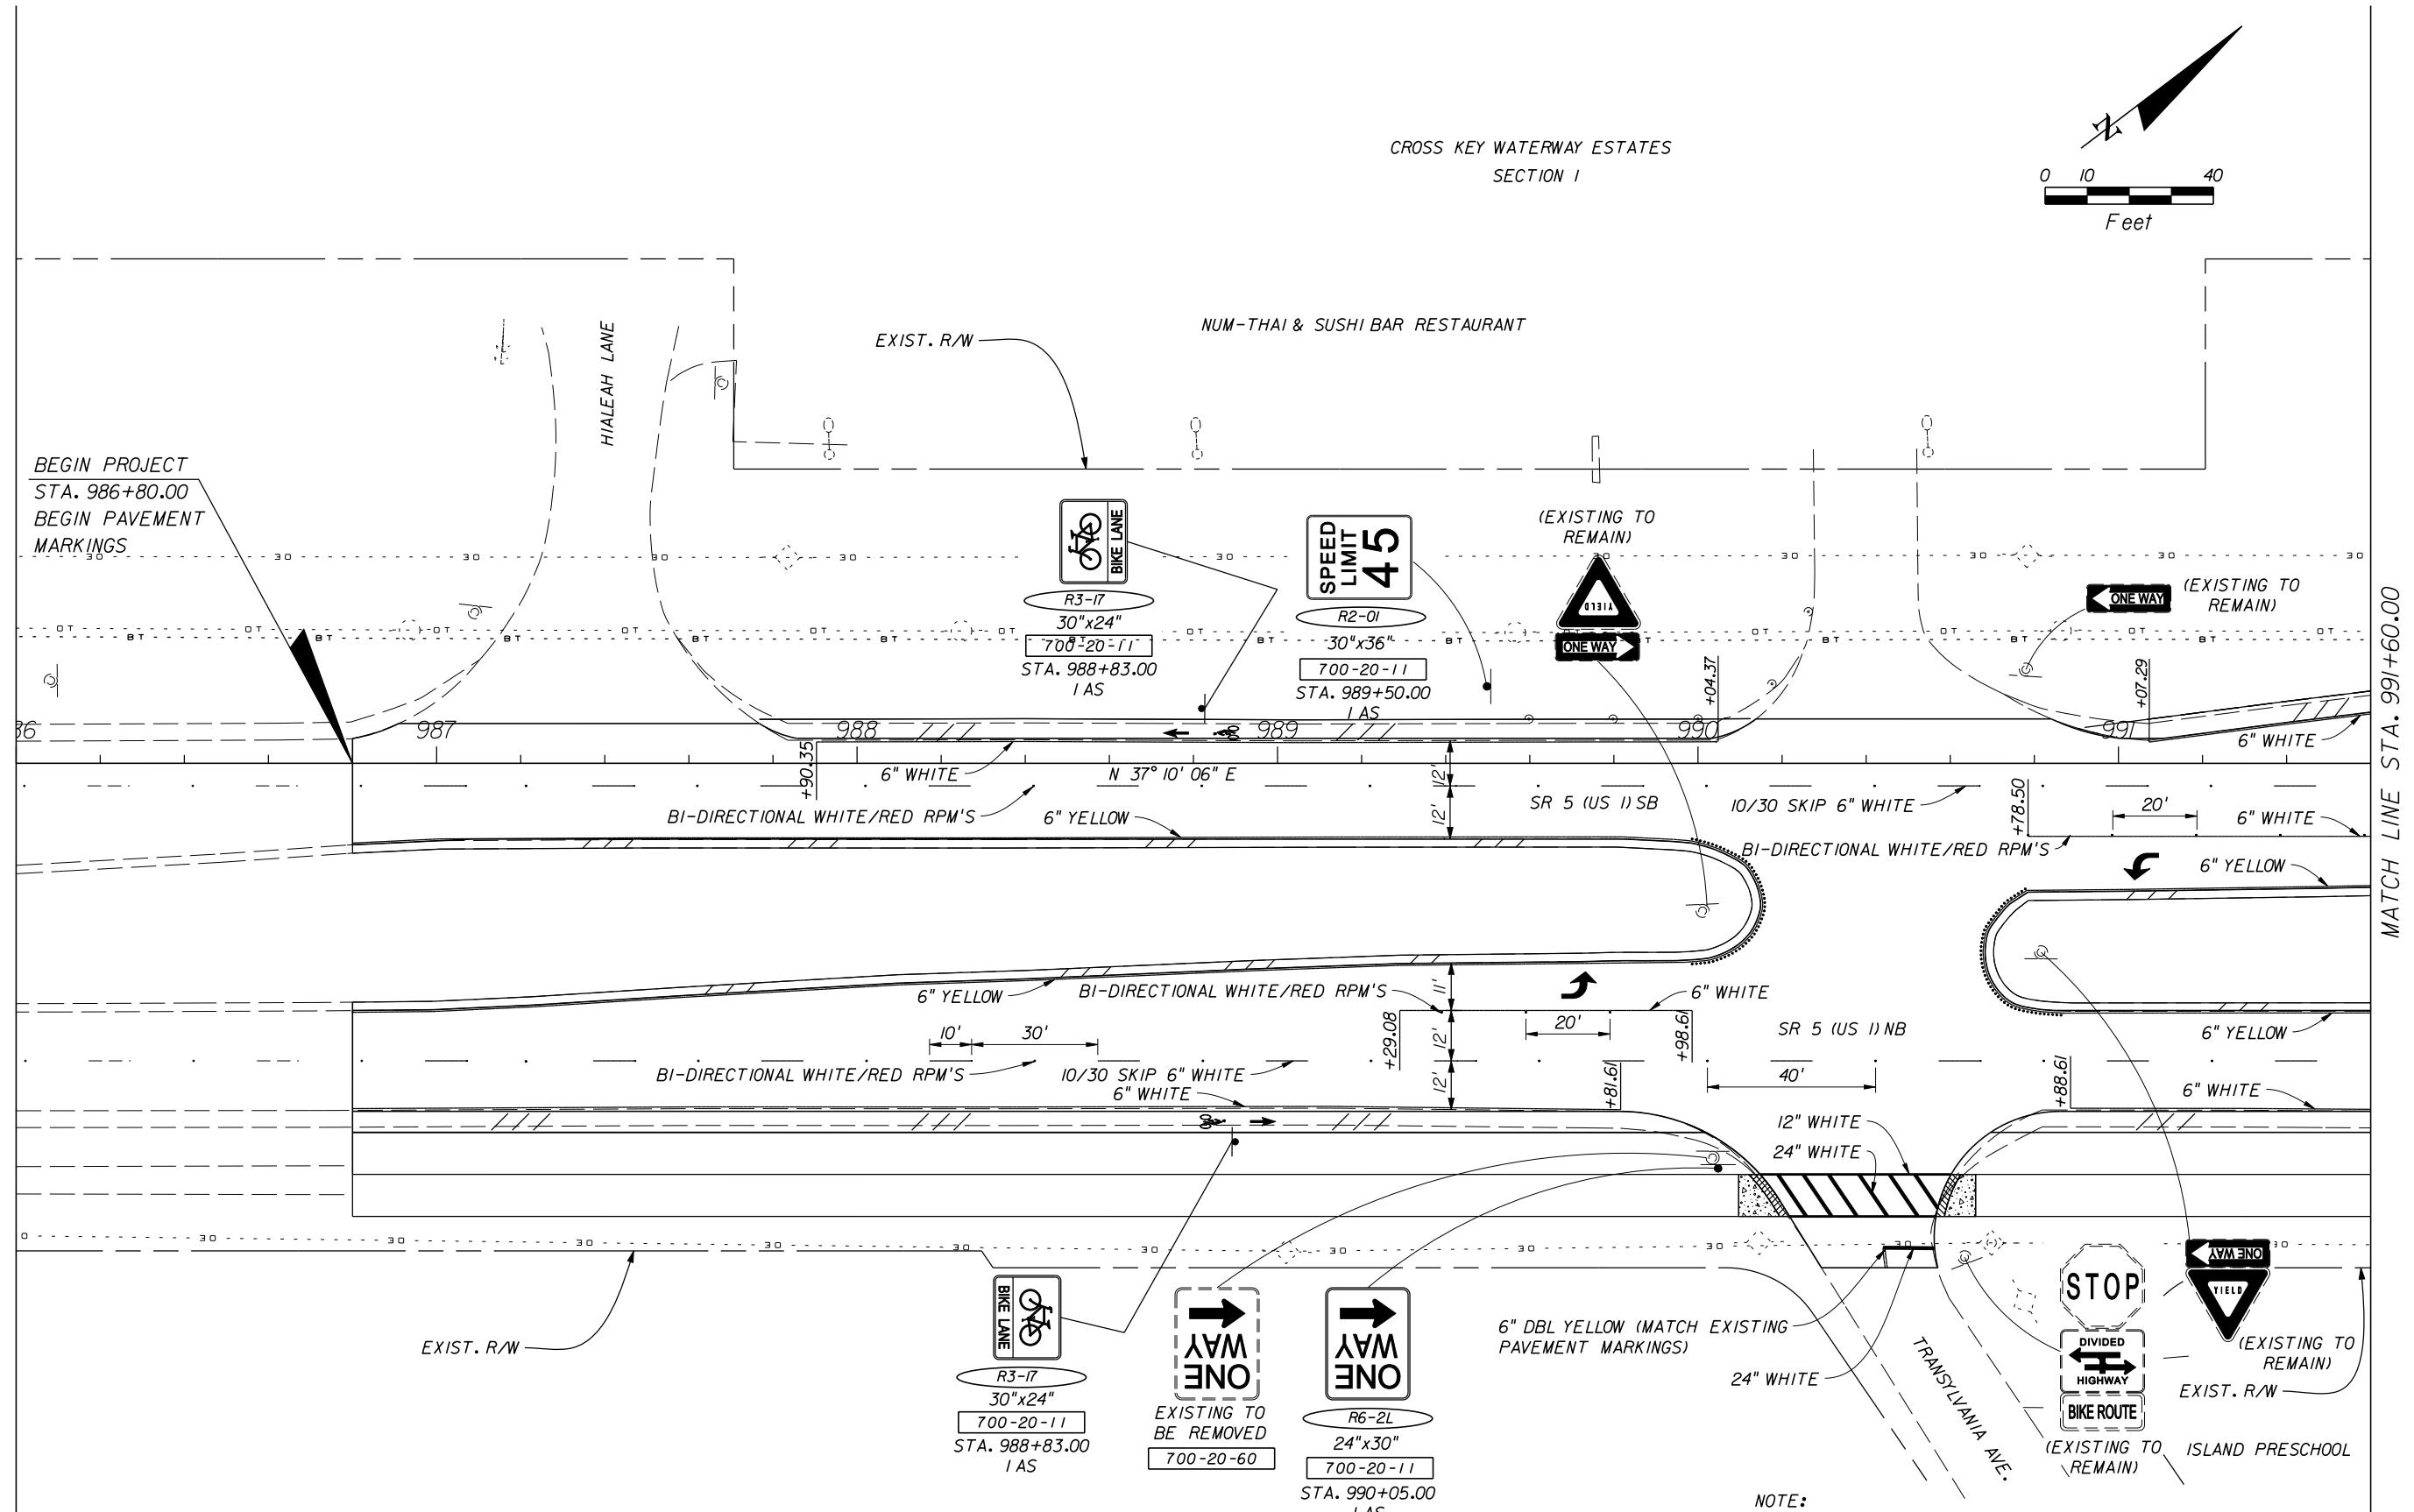

1. CROSSWALK IS TO BE INSTALLED AT ALL SIDE STREETS, TRAIL CROSSINGS AND US-1 OVERSEAS HIGHWAY.
2. LONGITUDINAL LINES SHALL BE SPACED TO AVOID THE WHEEL PATH OF VEHICLES. THE MAXIMUM SPACE BETWEEN MARKING SHALL NOT EXCEED 60". ADDITIONAL LONGITUDINAL MARKING SHALL BE PLACED AT THE CENTER OF EACH LANE.

CROSSWALK MARKING DETAIL  
N.T.S.

SIGNING & PAVEMENT MARKING NOTES:

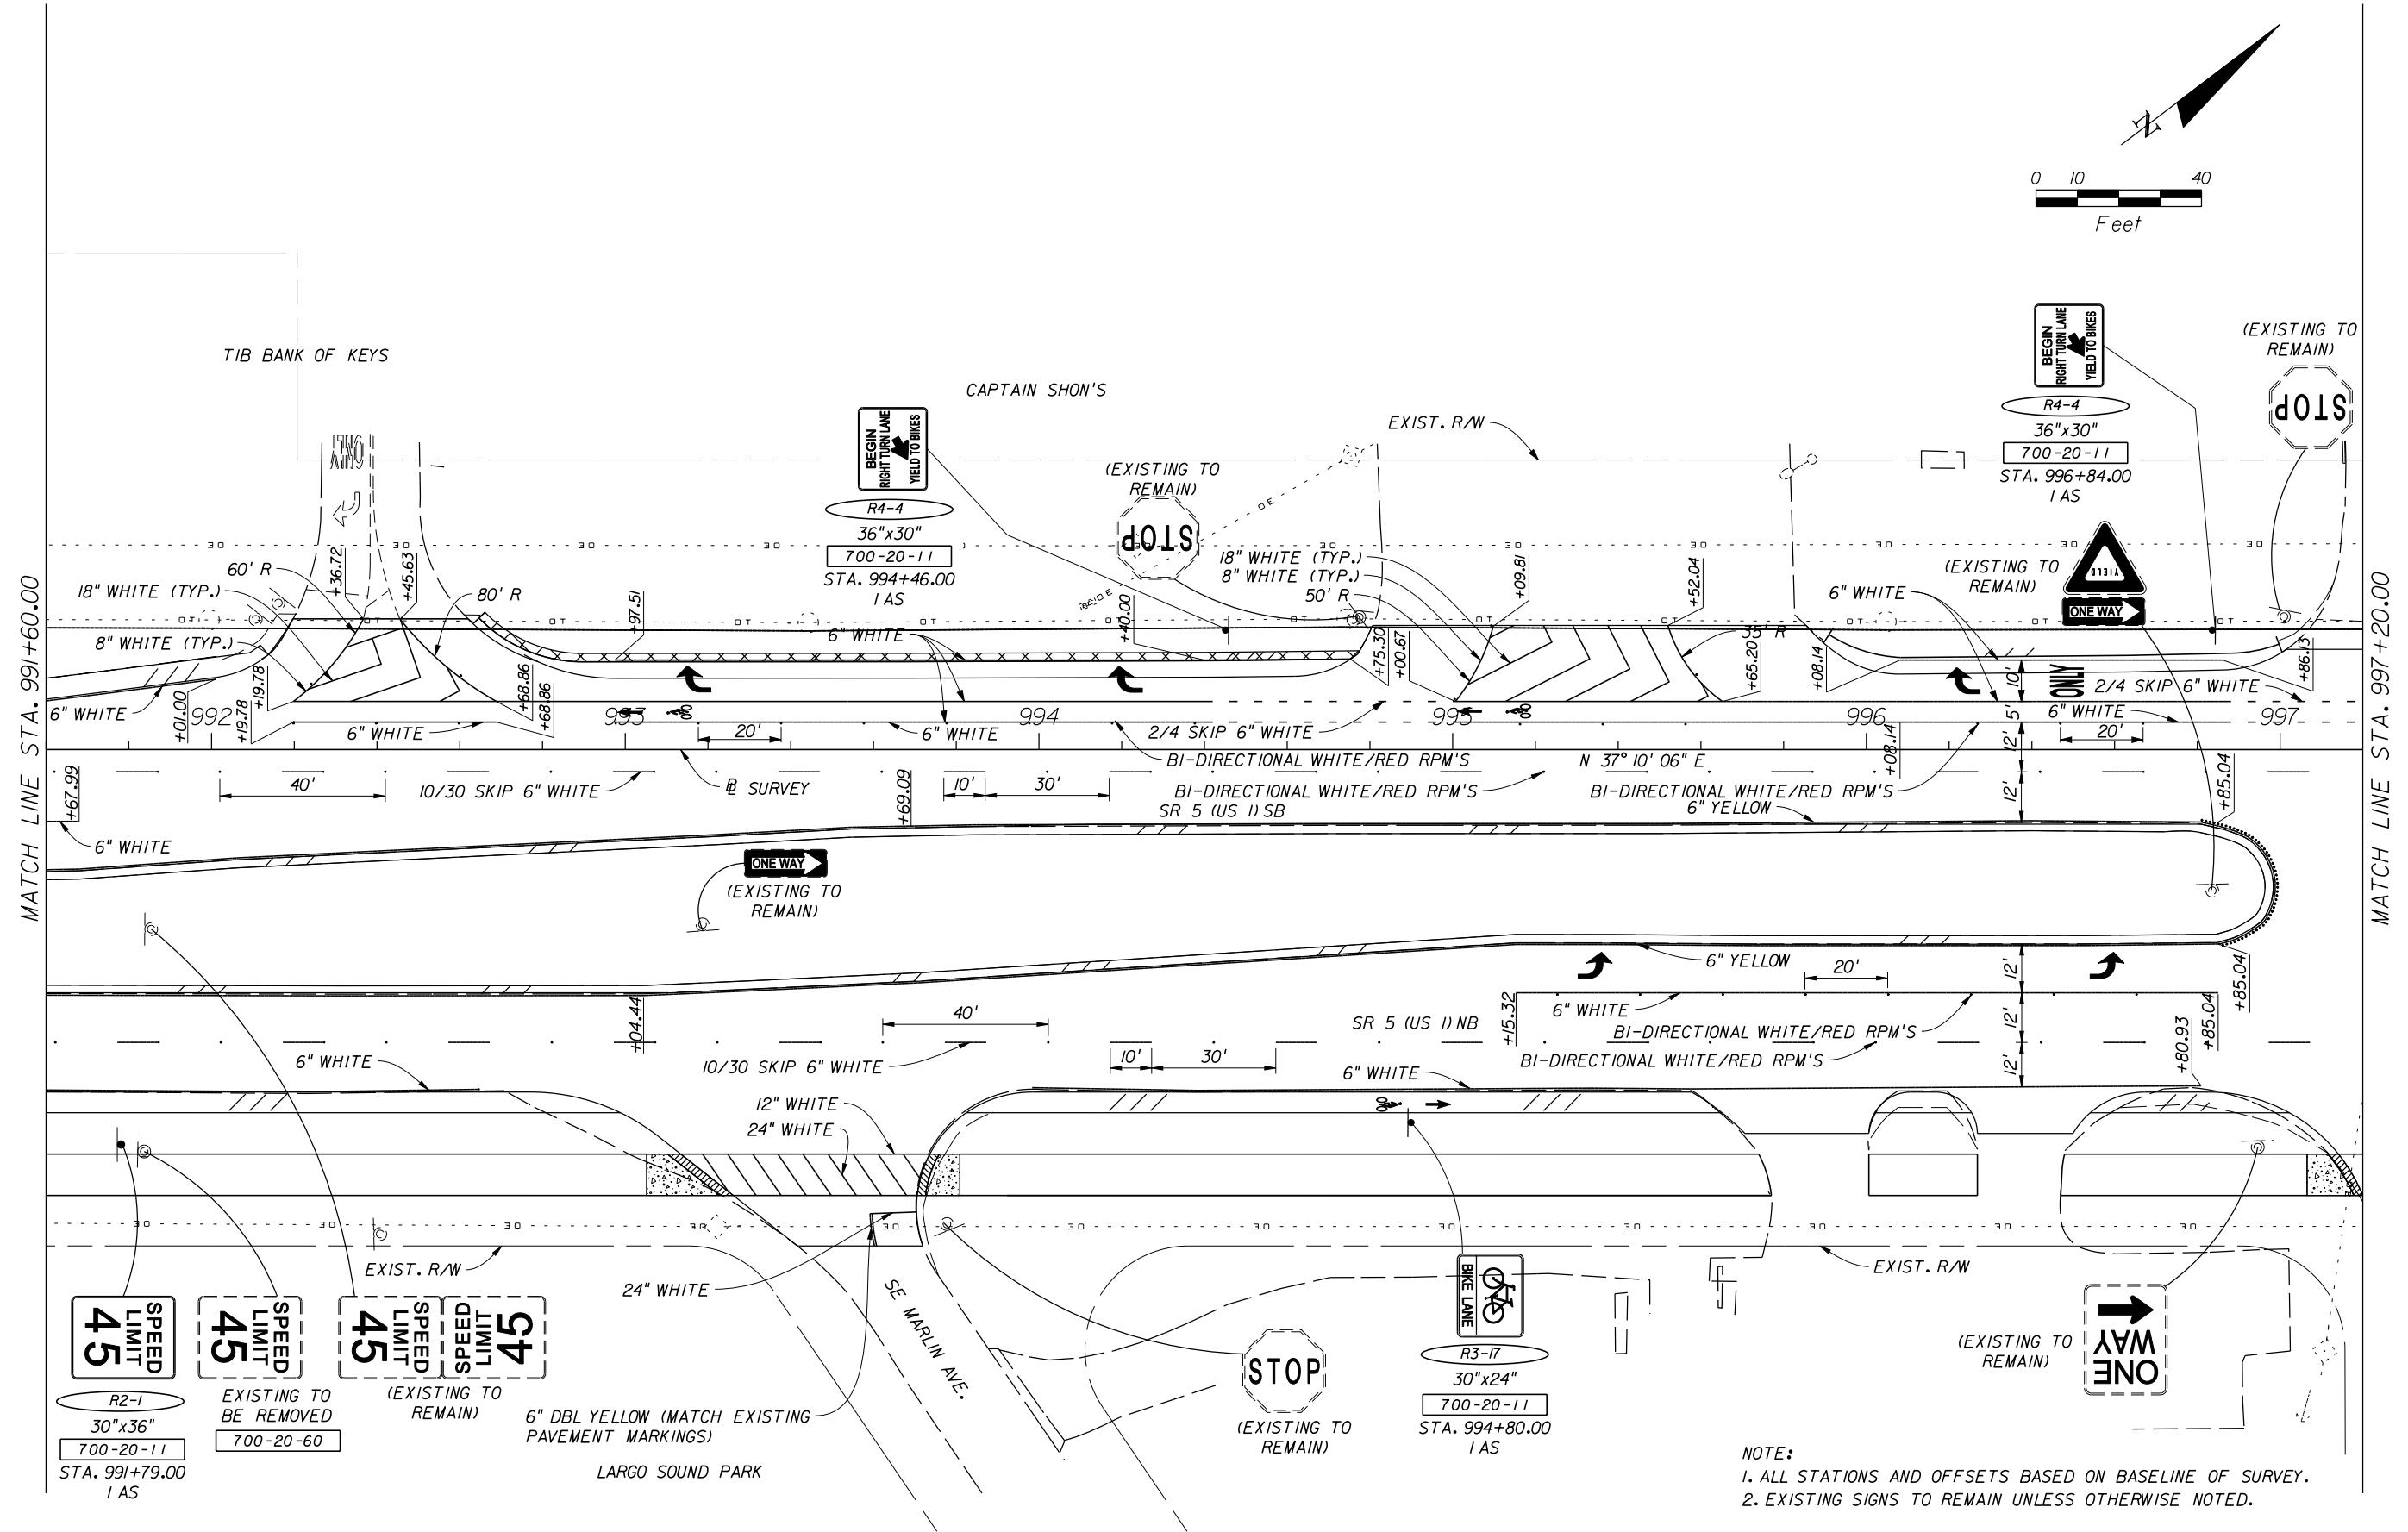

1. All signing and pavement markings installed as part of these plans shall conform to the 2009 edition of the Federal Highway Administration (FHWA) Manual of Uniform Traffic Control Devices for street and highways, Florida Department of Transportation Design Standards. All sign panels shall be fabricated to comply with the most recent edition of the Federal Highway Administration Standard Highway Signs.
2. The Contractor shall match existing pavement markings at the beginning and the end of the project and at all side streets without jogs and offsets.
3. Sign assembly locations shown on plans which are in conflict with lighting, utilities, driveways, wheelchair ramps, etc., may be adjusted slightly as directed by the Engineer. Extreme location changes must be approved by the District Traffic Operations Department.
4. Incorrectly placed (thermoplastic or) paint markings over friction course will be removed by milling and replacing the friction course a minimum width of 18 in at the Contractor's expense. The Engineer may approve an alternative method if it can be demonstrated to completely remove the markings without damaging the asphalt.
5. The Contractor shall relocate all existing post-mounted street name and stop signs to a visible area undisturbed by the construction so as to minimize damage to the signs during construction. The Street name shall be reattached to the top of the new stop signs on minor side streets at the end of construction. The new Stop sign post shall have adequate length to accommodate the existing street names at the top. Cost of relocation and reattachment of street name sign shall be paid for under pay item 102-1, Maintenance of Traffic.
6. Extruded aluminum sign support clamps are not acceptable. All relocated signs must comply with the Standard Specifications, Special Provisions and Roadway Design and Traffic Standards as if they were new signs. If existing clamps, brackets, poles, etc. need to be replaced the cost shall be included in the relocation pay items.
7. The Contractor shall submit a list of the existing signs to the Project Engineer at the Pre-construction Conference. Any lost or damaged signs during construction shall be replaced at no additional cost. Cost of maintaining existing signs to be included in Item 102-1, Maintenance of Traffic.
8. Installations of new pull boxes shall be performed by a qualified and licensed electrical Contractor. When a new pull box replaces an existing pull box, the Contractor shall adjust conduits and cables to fit the new pull box elevation. Cost of adjustments is included in the pull box pay item.
9. The Contractor shall construct concrete slabs around all pull boxes; controllers and service points located in unpaved/grass areas. See index I7500 for details and notes. Cost of the slab construction, including reinforced steel fabric, shall be included in the related pay items for pull boxes; controllers and service points.
